# Life Science – Key Strategies for FY03/2027

## I. Strengthening Global Collaboration

- Integrated strategies with overseas subsidiaries
- Expansion of overseas market share for fruit acids
- Increased sales of food

## II. Securing Domestic Market Share

- Maintain share in key product categories  
(Citric acid, Vitamin C, Malic acid, Fumaric acid)

## III. Review and Reinforcement of FFA Products

- Strengthen development from a global perspective
- Accelerate commercialization of new products
- Enhance application proposals for food additives

## IV. Strengthening In-house Group Production

- Optimize external manufacturing
- Invest in facilities for stable, efficient operations

# I . Strengthening Global Collaboration

Business strategy integrated with overseas subsidiaries

USA

China

Qingdao Fuso  
Refining &  
Processing  
Co., Ltd.

- Expand operations in Asia(China, Thailand, Vietnam etc.)
- Develop products aligned with customer needs

FUSO  
(THAILAND)  
CO., LTD.

Thailand

**Fuso Chemical**  
**Co., Ltd**  
**Headquarters**  
**function**

PMP  
Fermentation  
Products, Inc.

Japan

- Promotion of an optimized production, development, and sales structure
- Stable operation of Malic acid

**FUSO brand development**

**Technical capability**

**Product strength**

**Supply capability**

# I . Strengthening Global Collaboration

## Malic Acid & derivatives

### Sales Strategy

- Increase sales volume through strategic pricing by region
- Expand sales in North America and Europe
- Develop new applications (e.g., agricultural materials)

Malic acid: Overseas sales volume

## Gluconic Acid & derivatives

### PMP PY2025 Results

- Sales: approx. ¥ 8.2billion (record high)
- Operating profit: approx. ¥1.2 billion (105% YoY)

### Sales Volume

- Via price adjustments to recover share (since early 2024)
- Sales volume: +7% YoY

### Capacity Expansion

- Dec 2023: fermentation equipment expansion
- July 2027: crystallizer expansion (ongoing)

Net sales at PMP

(unit : 100 million s of yen)

## II. Securing Domestic Market Share

### Citric Acid

#### Sales Strategy

- Win bidding projects
- Timely price revisions reflecting raw materials
- Secure volume with major beverage and detergent

Sales Volume

### Vitamin C

#### Sales Strategy

- Expand share of high value-added products
- Recover lost customers via flexible pricing
- Capture bidding opportunities

Sales Volume

## II. Securing Domestic Market Share

### Malic Acid

#### Sales Strategy

- Maintain and increase share among major users
- Improve competitiveness via in-house salt production
- Expand sales of by-product solutions

Sales Volume

### Fumaric Acid

#### Sales Strategy

- Maintain share with key customers
- Regain large accounts with flexible pricing
- Secure bidding projects

Sales Volume

# III. Review and Reinforcement of FFA Products

## Establishing a global development structure

- Strengthening cooperation among Japan, China, and Thailand
- Improving customer service through the expansion of Tokyo R&D

## Speedy launch of new products

- Strengthening collaboration among development, production, and sales
- Making the most of in-house facilities

## Enhancing application proposals of food additive formulations

- Expanding products of Qingdao Fuso into the Japanese market
- Identifying customer needs accurately

Tokyo R&D

FFA Sales ratio by country

FFA Sales ratio by application

# IV. Strengthening In-house Group Production

## Revision of outsourced items

- Cost reduction by shifting production of externally sourced items to in-house production  
Product candidates : Fruit acid salts, food additives  
Potential locations : Osaka Factory, Qingdao Fuso
- Consolidation of low-profit and declining-sales items

Sales Results FY03/26

Targets: **75% in-house production rate**

Osaka Factory

## Investment for stable, high-volume operations and efficiency improvements

### FY03/27 Plan

- Osaka Factory : new office (including laboratories)
- Kashima Plant : tank repair
- PMP : expansion of crystallization tank and ancillary facilities

# ※ Impact of Middle East Instability

## ● Malic acid•Fumaric acid•Maleic anhydride

Benzene(key raw material): Soaring prices and supply instability

### 【Supply】

- Maleic anhydride : Operating until the scheduled maintenance(early May) , secured raw materials
- Regarding operations following the scheduled maintenance (late June), uncertainly surrounding benzene supply
- Under consideration for production of malic acid and fumaric acid by external procurement of anhydrous maleic acid

### 【Price】

- Benzene prices remain high, revising prices

## ● Citric acid

Rising purchase prices of sulfuric acid (a secondary raw material) by disruptions in sulfur supply

## ● Gluconic acid•Vitamin C

No direct impact currently

## ● All items

Instability in the procurement of logistics materials, and soaring prices

### Benzene and Its Derivatives

### Price of benzene ACP (\$/MT)

## II. Segment Result

# Electronic Materials Business – FY2025 Overview *FUSO*

| (unit:100 millions of yen) | 3/'25 | 3/'26        | Y on Y |                                                                                            |
|----------------------------|-------|--------------|--------|--------------------------------------------------------------------------------------------|
|                            |       |              | change | ratio                                                                                      |
| <b>Net sales</b>           | 332.1 | <b>415.1</b> | +83.0  | +25.0%  |
| <b>Operating profit</b>    | 131.7 | <b>159.2</b> | +27.5  | +20.9%  |

(unit : 100 million yen)

## Factors Affecting Net Sales

- +**
  - Increase in colloidal silica sales volume
  - Strong demand from AI semiconductor applications
  - Growth in sales volume to China
- - Weak demand from PC and smartphone applications

## Factors Affecting Operating Profit

- +**
  - Higher utilization rates driven by increased sales
  - High operating rates of new production facilities
  - Improved production efficiency
- - Increase in depreciation expenses
  - Rising labor and maintenance costs associated with additional production lines
  - Increase in raw material costs

# Electronic Materials – Key Strategies

## I. Responding to the Rapidly Expanding Semiconductor Market

### 1. Enhancement of Production Capacity

- Early certification of the new production line (Kashima Phase II)
- Expansion of high-concentration and high-productivity products, and realization of planned production
- Multi-qualification / Optimization of existing equipment operations / Maintenance improvement / Shortened ramp-up time

### 2. Initiatives Toward the Next Generation

- Product development for leading-edge semiconductors and advanced packaging
  - Preparation for the next phase of capital investment
- Market and technology intelligence gathering, Development of pricing strategies

## II. Quick and Flexible Response to Changes in the External Environment

- Price adjustments to appropriately pass on cost increases
- Addressing supply chain risks, including the Middle East

## III. Portfolio Transformation toward New Functional Materials

- Ensuring the adoption of Mirarika™ (hollow sub-micron silica)

# Electronic Materials Business – Initiatives & Results

## FY03/2026 Key Initiatives

Kajima [I & II], Kyoto new line start-up and certification

Adapting to cutting-edge technologies

Passing through cost increases to prices

Capturing new demand

Expansion of high-concentration and high-productivity products

Addressing supply chain risks

Launch of next-generation products

## FY03/2026 Result

Kajima [I] : Full operation

Kyoto : Completed certification

Kajima [II] : Completed construction in August

Adopted for TSMC N2-generation nodes

Confirmation of requirements for the A16/A14

Agreement on price increases associated with the next round of capital investment

Expansion in China: 10% of divisional sales

Increase in the share of total production volume

Diversification of metal silicon suppliers

Start of construction of a mass-production line for Miralika™ (hollow silica)

# I . Responding to the Rapidly Expanding Semiconductor Market

# I – 1. Expansion of High-Concentration and High-Productivity Products

## ① Enhancement of Production Capacity

- Increase the production rate of silica particles per unit time and raise the number of silica particles per unit volume (approximately 1.5 times compared with conventional levels).

# I – 1. Expansion of High-Concentration and High-Productivity Product

## ② Quick Start-Up and High Utilization

- Conventional Line Cleaning:  
Several months required after equipment completion
- Improved Cleaning Methods:
  - ⇒ Establishment of a system enabling significantly shortened cleaning time through optimized cleaning approaches
  - ⇒ Shortened customer qualification activities and earlier transition to mass production

## ③ Automation for Future Labor Shortage Mitigation

- Five-Year Smart Factory Roadmap for Silica Facilities
  - ⇒ Mechanization reduces manual workload and doubles equipment management capacity per operator
  - ⇒ Implementation of the Three A's: Automated Analysis, Automated Sampling, and AI

# I – 2. Initiatives Toward the Next Generation

## Development of new products for advanced semiconductors

### 【Advanced Packaging】

A cutting-edge packaging technology in which multiple semiconductor chips are stacked in three dimensions, with shortened interconnects between chips to reduce signal delay

※ **Shift in HBM architecture**  
Hybrid bonding enables direct chip bonding, allowing for faster signal

### ● Increasing Demands on CMP

1. Thicker films to be polished, requiring higher removal rates
  - ➡ Development of dense, ultra-high-purity colloidal silica
2. Higher precision required for bonding surface planarization
  - ➡ Expansion of product lineup with reduced large and fine particles

### ● Emerging Opportunities for CMP

- Wafer backside polishing for silicon substrates
- Cu metal layers and TSV (through-silicon via) structures
- Polishing of next-generation conductors (e.g., Ru, Mo) and polymer layers

## II. Quick and flexible Response to changes in the external environment

### 1 Price Pass-Through

#### ① Cost Sharing for Future Investments

- Mitigation of increased depreciation expenses: Requesting customers to bear a portion of upcoming capital expenditures
  - \* Implementation of a 5–10% price increase

#### ② Continued price pass-through for cost increases

- Addressing rising costs:
  - energy costs and raw material prices
  - passing cost increases on to sales prices
- Improving negotiating power through higher production efficiency and increased purchase volumes

### 2 Supply Chain Risk

- Diversification of metallic silicon procurement countries expanding the share of supply from Malaysia, Brazil, and other sources (Target: over 50% by 2030)
- Measures to mitigate the risk of rising raw material prices : multiple sourcing, reduction in raw material usage

Prepared by FUSO Sources : Trade statistics by Ministry of Finance

### 3 Middle East Situation

- Addressing the surge in fuel, logistics, and other costs
- Reassessing supply chain risks
- Reducing the consumption of consumable materials and exploring recycling initiatives
- Information sharing and coordination with relevant government authorities

# III. Development of next-generation products

## □ CMP

- ➡ continue sample work for A16/A14
  - certifying High-Concentration, high productivity product

## □ Hollow Submicron Silica Miralica™

- ➡ continue sample work for multiple companies, focusing on applications for low-dielectric materials
- ➡ finalizing production setup

and preparing for the product launch in FY03/'27

## □ Toner additives

- ➡ FY03/'27~  
sample work for several companies

## □ for cosmetic applications

- ➡ continue sample work

## □ CMP

- Start development for the A10
- Expanding product lineup, High-Concentration, high productivity product

## □ new material development

- high purity organo silica sol
- porous silica
- silica nanosheets
- FDC™※
- silica-coated material

※FUSO Dispersible Coat: proprietary particle coating technology

## □ Chemical Materials Japan, nanotech 2026

## Ⅲ. FY03/2027 Outlook

---

## **IV. Medium-Term Management Plan**

---

**“Next growth 2030”  
(FY03/2027~FY03/2031)**

**FUSO CHEMICAL**

## Company Motto: “Limitless Progress and Creation”

### Management Philosophy

- Value trust, and make it a principle to be reliable
- Contribute to the nation and society through technology
- Achieve employee fulfillment through prosperous business

### Long-Term Vision

- Evolve as the global niche leader
- Support the future with FUSO technology
- Challenge limits to create new businesses
- Ensure that FUSO business delivers customer satisfaction

# 1. The previous Medium-Term Management Plan

## Operating profit target largely achieved.

### Summary of FY03/2026 results

**Operating profit:**  
**18.8 billion yen**  
(Plan: 19.0 billion yen)

(unit: 100 millions of yen)

Net sales: 76.9 billion yen  
(Plan: 85.0 billion yen)

EBITDA: 29.7 billion yen  
(Plan: 30.0 billion yen)

Overseas sales ratio: 55.1%  
(Plan: 50%)

Left: Result  
Mid: Original Plan  
Right: Revised Plan

# Outline of Medium-Term Management Plan

## Life Science Business Strategy

- Strengthen global cooperation
- Maintain and enhance stable supply and quality assurance
- Enhance core competencies (develop new fields)
- Boost surveying and marketing initiatives

## Electronic Materials Business Strategy

- Stabilize supply and quality
- Address cutting-edge requirements
- Develop new businesses harnessing core technologies
- Reinforce the business foundation

## Production Division Production Framework

- Reinforce the framework for stable production
- Increase productivity
- Gain customer trust
- Enhance the value of human capital

## New Medium-Term Management Plan Next Growth 2030 (covering FY03/2027 to FY03/2031)

### Higher market value

- Achieve high CAGR
- Engage in ROIC-driven management

### Higher human capital value

- Implement human resources strategy in line with the new Management Plan
- Enhance employee engagement
- Other measures

### Increased trust in FUSO

- Establish a committee on enhancing corporate value to promote and manage progress
- Design an executive compensation system linked to the new Management Plan

### Increased sustainability

- Achieve harmony with the local community
- Engage in GHG reduction initiatives

## 2. New Medium-Term Management Plan

### ■ FY03/2031 Consolidated Financial Targets (unit: 100 millions of yen)

#### Net sales

FY03/2026 result 769  
FY03/2031 target 1,200  
(CAGR: 9.3%)

#### Operating profit

FY03/2026 result 188  
FY03/2031 target 360  
(CAGR: 13.8%)

#### EBITDA

FY03/2026 result 297  
FY03/2031 target 567  
(CAGR: 13.7%)

\*Assumed exchange rate for the Medium-Term Management Plan: USD/JPY = 150

- Expand revenue through execution of growth strategies (more than 1.5x over five years)
- Target an operating margin of 30% (nearly double operating profit over five years)
- Drive growth and profitability through stable supply and high quality

## 2. Financial / Non-Financial Targets and KGI/KPI

### FY03/2031 KGI (unit: 100 millions of yen)

Net sales: 1,200      Operating profit: 360  
EBITDA: 567

### Market Value

- Net sales CAGR    9%+
- ROIC                    13%+
- Shareholder returns:  
Continue progressive dividends;  
total payout of ¥20 billion+

### Human Capital Value

- Engagement score:  
+10% vs. FY03/2026
- Average annual salary:  
+30% vs. FY03/2026

### Trust Value

Establish monitoring by the  
Corporate Value Enhancement  
Committee

### Sustainable Value

Set GHG reduction targets  
and achieve SBT certification  
(by 2028)

**Realize  
The Long-  
term vision**

**Enhancement of  
Four Values**

## 2. Key Capital Expenditure Plans under the New Medium-Term Management Plan

### 3. Growth Strategy for the Life Science Business

#### ■ Strengthen global cooperation

- Build the FUSO brand globally through integrated operations across Japan, China, the U.S., and Thailand

#### ■ Boost surveying and marketing initiatives

#### ■ Enhance core competencies

- Expand sales of FFA products and roll out new food additive formulations globally

#### ■ Maintain and enhance stable supply and quality assurance

#### ◆ Performance Targets (unit: 100 millions of yen)

##### Net sales

FY03/2026 result 354  
FY03/2031 target 430  
(CAGR: 4.0%)

##### Operating profit

FY03/2026 result 53  
FY03/2031 target 75  
(CAGR: 7.2%)

##### EBITDA

FY03/2026 result 69  
FY03/2031 target 95  
(CAGR: 6.5%)

## 4. Growth Strategy for the Electronic Materials Business

### ■ Stabilize supply and quality

- Accelerate ramp-up of expanded capacity and execution of the next round of investments
- BCP readiness; strengthening critical processes and supply chain resilience

### ■ Address cutting-edge requirements

### ■ Develop new businesses harnessing core technologies

### ■ Reinforce the business foundation

### ◆ Performance Targets (unit: 100 millions of yen)

#### Net sales

FY03/2026 result 415  
FY03/2031 target 770  
(CAGR: 13.2%)

#### Operating profit

FY03/2026 result 159  
FY03/2031 target 320  
(CAGR: 15.0%)

#### EBITDA

FY03/2026 result 250  
FY03/2031 target 505  
(CAGR: 15.1%)

## 5. Management Focused on Cost of Capital and Share Price

### Current Status

- Market valuation  
PBR 2.5x
- Capital efficiency  
ROE exceeding the cost of equity  
ROIC maintained at over 10%
- Actions during the previous  
Medium-Term Management Plan  
Reduction of strategically held shares  
(Listed shares: 25 issues → 1 issue)  
Share repurchases and split

### Policy

- Focus on early ramp-up and monetization of completed investments  
Improve utilization of past investments
- Start building a framework to utilize ROIC in management decision-making  
Embed capital efficiency into decision-making throughout the organization
- Continue pursuing both revenue growth and capital efficiency  
Management control with an emphasis on the balance between profitability and invested capital

**Target ROIC: 13%**

## 6. Cash Allocation and Shareholder Returns

IN

OUT

Operating CF  
164.0  
billion yen

### ■ Priority: Growth Investment

Using approximately ¥164.0 billion of cash inflow, allocate a total of approx. ¥100.0 billion to growth investments as the highest priority, including:

Kyoto Site capital expenditure: 40.0 billion yen

New R&D base in Higashi-Osaka, etc.

### ■ Shareholder Return Policy

Continue progressive dividends

Assume total returns of approx. ¥20.0 billion as a guideline for the Medium-Term Management Plan period

Consider additional returns flexibly as appropriate

*Note: Borrowing of approx. 17.0 billion yen are scheduled to be repaid during the Medium-Term Management Plan period.*

## 7. Human Resources Strategy to Support Execution of the Medium-Term Management Plan

### Fostering well-being

Support for autonomous career development  
Enhancing trust in evaluation, etc.

## Enhancement of Human capital value

### Securing the workforce required for next growth

Strategic allocation to growth areas  
Proactive investment in talent development, etc.

### Developing talent to drive sustainable growth and innovation

Development of next-generation leaders  
Highly specialized and global talent

## 8. Initiatives to Enhance Sustainable Value under the New Medium-Term Management Plan

### ■ Aim to achieve SBT certification by FY03/2029

#### Roadmap

*Note: Emission reductions will be implemented in phases, starting with our own emissions (Scope 1 and 2)*

## Important Notice Regarding the Outlook

The descriptions and figures stated in this material regarding the outlook are based on information obtained from our group companies as of the present time as well as certain assumptions deemed to be reasonable.

However, due to risks and other variables, we cannot guarantee the attainment of the targets stated herein. In addition, the actual performance may greatly vary in accordance with the economic climate surrounding the business, demand trends, exchange rate movements and other various factors.
